

REMARKS

Claims 1-15 have been canceled. Claims 16-40 have been added. Therefore claims 16-40 are pending in the application.

The rejections of claims 1-15 are moot in light of the cancellation of these claims. Added claims 16-40 distinguish over the cited art for at least the following reasons.

The Examiner primarily cites U.S. Pat. 6,061,714 to Housel, III et al. (hereinafter "Housel") and U.S. Pat. 5,491,800 to Goldsmith et al. (hereinafter "Goldsmith"). Housel teaches a system for remote communications between a terminal emulator application and a host application in which the communications are made more efficient by using a "differenced" communication (Housel -- col. 7, line 22 – col. 10, line 48). Goldsmith teaches an object oriented remote procedure call (RPC) mechanism using a client-server facility and a networking service facility having API and RPC objects (Goldsmith -- col. 10, line 13 – col. 12, line 31). Neither Housel nor Goldsmith has anything to do with communications on a computer system between a platform independent language application and native language application using a mediation module(s), as recited in the added independent claims.
